

Olga Romashkina

Hi! I'm a product designer with 6+ years of experience.

I spent a big part of that time in EdTech, partly because I'm always learning something myself. That's also what keeps me curious about new domains, and lately it's been pulling me toward code and AI, building small things on the side.

I've worked in mature companies and startups alike, across web and mobile. When it helps move things forward, I step beyond design and often take on product ownership as well.

Education

BA in Advertising and Public Relations, St. Petersburg State University of Film and Television, 2014 — 2018

Personal Projects

Speech Coach, a personal English learning tool I designed, built, and shipped end-to-end on my own

Stack: Next.js, OpenAI API, Supabase

Built with: Claude Code and Codex

englishhh.vercel.app

Skills

Product design, UX/UI, design systems, visual design, interaction design, prototyping, user research

Working knowledge of HTML, CSS, TypeScript, Tailwind, React, Next.js

AI agents, LLMs

Cross-functional collaboration, product ownership, facilitation

Tools

Figma, VS Code, Cursor, Claude Code, Codex, V0, Conductor, Supabase, PostHog, Git

Languages

Russian Native

English Professional working proficiency

TripleTen by Nebius

Senior Product Designer • Mar 2024 — Mar 2026

TripleTen, named the best tech bootcamp in the US by Fortune, helps people transition into IT careers. The learning platform has over 20K monthly active learners.

I owned multiple platform features, including AI-powered ones, often taking on product management alongside design:

Launched an AI English tutor, achieving 65% weekly active usage.

Led AI vector search as designer and PM, reduced search time, and cut lesson-finding support tickets by 10 pp.

Built an AI reviewer that dropped student wait time from 20 hours to 2 minutes and freed up 20% of instructor time.

Integrated Jupyter Notebooks and Google Sheets into the platform, boosting project completion rates by 16%.

Proactively spotted product gaps, turned them into validated concepts, and got them onto the roadmap.

Led design for the B2B upskilling platform and the personal dashboard for managers and HR at Nebius Academy.

Skyeng

Product Designer • Jul 2022 — Mar 2024

Skyeng is one of Eastern Europe's top three EdTech companies, with a language learning ecosystem serving 120K+ monthly active users.

I led design across the educational services unit:

Rebuilt an English vocabulary service from scratch for iOS, Android, and web, increasing daily retention by 8 pp and time spent by 14%.

Redesigned lesson preparation and homework review interfaces for tutors, reducing user complaints by 15%.

Shaped design culture by starting and running concept sessions.

Pinkman Design Agency

UX/UI Designer • Nov 2021 — Jul 2022

Designed marketplaces, career sites, and corporate websites for Yandex, Sber, and X5 Retail Group.

Blue Tiger Design Agency

UX/UI Designer • Dec 2019 — Nov 2021

Designed landing pages and online stores.
